

Spreading Reflective Leaflets

Comfort and Safety

- Work with a partner.
- Wear a hard hat.
- Make sure the attic is well lighted.
- Work only in reasonable temperatures.
- Step only on joists or the center of a moveable board which bridges joists.
- If glass fiber insulation is present, wear a long-sleeved shirt with collar and cuffs buttoned, plastic gloves and plastic bags over shoes.
- Two dust masks are provided.

Fire Safety

- Reflective foil is conductive.
- Repair any obvious frayed or defective wiring.
- Do not place leaflets near bare stove pipes, electrical fixtures, motors, fans or any recessed lighting fixtures.

Application

- Scatter the leaflets by the handful until the insulation is completely covered.
- Remember, a single layer is as effective as several layers.
