

## ... to destroy household odors - ozone.

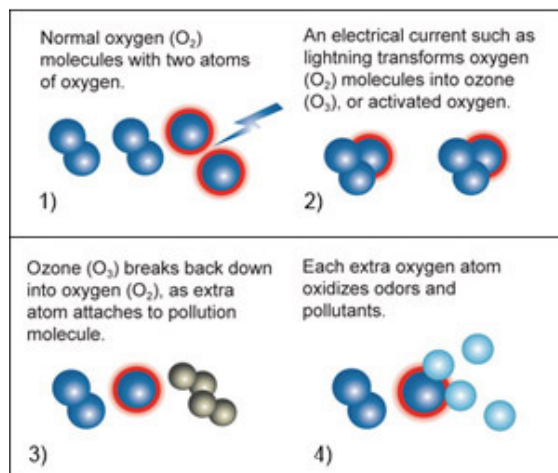

An ozone generator generates  $O_3$ , ozone, a very active molecule, which destroys odors (organic molecules) through oxidization, the product of which is  $CO_2$  and  $H_2O$ .

Generated ozone molecules diffuse throughout the volume treated and neutralize odors from: perfumes, cigarettes, smoke damage, mold & mildew, decay, cooking, food, pets, carpets, water damage, cleaning chemicals, construction.

### Caution!

Ozone generators are for use in **unoccupied spaces** only. Never ozonate when people are present. Long-term exposure to even low concentrations causes eye and respiratory irritation.

Ozone generators may be rented or purchased.
