

...to add silver-ion technology to any washing machine.

Installing silver-plated cloth
(attached to hose washer)
in the cold water supply hose.

Automatically adding silver ions to your wash:

- Adds impressive odor-removing capability.
- Kills odor-causing bacteria in cold water.
- Makes sanitizing with chlorine bleach unnecessary.
- Ends mildew problems.
- Prevents cross contamination.

The Alternative:

... a \$1000 Samsung SilverCare® (WF337AA) washing machine.

Through electrolysis, this new machine generates silver ions and blends them with wash cycle and rinse cycle water.
